Your One-Stop Shop

Parts Catalog

Muller Martini is your **One-Stop Shop** for replacement parts, making it easy to keep your machines in peak condition while helping avoid costly downtime. And, as a world leader with tremendous volume, we offer outstanding pricing on our entire range of parts...giving you many opportunities to save money.

The Company You Trust,
the Confidence You Want
Just pick up the phone and put your mind at ease. You already have a relationship with Muller Martini, so you know you can count on us no matter what your parts requirements – either for a Muller machine or for other equipment in your shop.

Belting

Habasit belting at exceptionally low prices.

Bearings

Wide variety of SKF bearings in stock.

PerformancePlus Stitching Wire

Specially manufactured for superior value. Excellent tensile strength enables you to use higher-gauge wire for lower cost per stitch.

PerformancePlus Suckers

Extensive range of choices, unbeatable quality.

PerformancePlus Trimmer Supplies

Comprehensive selection of supplies for 3-knife trimmers: cutting sticks, pre-made pressing pads and pressing pad sheets for customized pressing pad assembly.

Trimmer Knives

Top quality high-speed steel or carbide for long life and lower cost of ownership.

Tool Kit

A must for every operator, improves operator and machine efficiency.

PerformancePlus Adhesives

Designed to optimize machine performance and protect your investment. Choose from low- or standard-temperature adhesives as well as pressure sensitive side glue.

PerformancePlus End Boards

Engineered for longer life with stronger material.

PerformancePlus Strapping Material

Designed to meet the toughest production demands.

Hardware

Nuts, bolts, washers, etc. Just ask, and we'll supply the right hardware.

Finishing Touches Corporate Store

Your destination for shirts, hats, promotional items and much more.

PerformancePlus Stitching Wire

Benefits of PerformancePlus

- ▶ **Meets or exceeds Consumer Product Safety Commission (CPSC) standards for lead content.**
 - ▶ Ability to stitch more pages. PerformancePlus allows you to use a smaller wire diameter without sacrificing the strength of a larger wire.
 - ▶ Smaller wire diameters help reduce stacking height.
 - ▶ Small wire diameters yield more stitches per spool.
 - ▶ Ideal for loop or saddle stitching applications.
- ▶ One wire size for multiple number of jobs to simplify your operation.
 - ▶ Better bending and forming characteristics.
 - ▶ Electro galvanized finish.
 - ▶ Consistent tensile strength. Consistent wire size. Consistent and uniform coating.
 - ▶ Trouble free de-spooling and low maintenance.

Can be used with most standard de-spoolers

Stitches/Pound of Wire		Stitches/lb	Increase
Gauge	FT/LB	Avg. Stitch = .75"	Stitches/lb

PerformancePlus Stitching Heads

PerformancePlus stitching heads are engineered specifically for Muller Martini stitchers, helping to maximize the production capabilities, reliability and operational productivity that Muller stitching equipment is known throughout the industry for.

PerformancePlus stitching heads feature a patent pending wire cutting system allowing thinner wire for thick products, as well as reduced crown width, that combine to offer a minimum 30% reduction in wire consumption based on weight.

Furthermore, because the wire is fed via an external feed unit, operation is easier and the stitcher head can be completely disassembled in minutes – this, in combination with proven, lowest maintenance intervals in a high speed environment, reduces labor and increases overall productivity.

Benefits of PerformancePlus stitching heads include:

- ▶ **Wire Savings** - New electronic wire feed and cutting system allows you to use lower gauge wire. Go from 24 to 25, 25 to 26, or 26 to 27 and get great results. Each change in gauge represents a 17% wire cost savings. With rising steel prices you get immediate savings and a quick ROI.
- ▶ **Lower Parts Cost** - The newly designed heads have fewer moving parts. This results in significantly lower cost of replacement parts. How much do you spend in stitching head parts yearly? You can expect at least a 50% savings in stitching head parts costs.
- ▶ **Reduced Maintenance** - This new head requires less maintenance. You can perform required maintenance in minutes. This gives you more uptime and will increase your productivity.
- ▶ **Easy Setup - Faster Makeready** - The electronic wire feed and wire length settings make setup a snap. You will reduce your makeready and gain valuable production time.
- ▶ **20% increase in production** - We have customers who report a 20% increase in production since installing the new system. This comes from easy setup and reduced maintenance.
- ▶ **Reduced postage costs** - When you use lower gauge wire you reduce the weight of your finished product providing postage savings.
- ▶ **40mm Center to Center** - Our heads are 40mm center to center. No other stitching head can get this close for 2-up work.
- ▶ **ROI** - This investment will make your operation more efficient for many years to come and provide you with a competitive advantage.

PerformancePlus Suckers

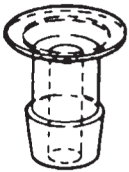

Benefits of PerformancePlus Suckers

- ▶ Highest quality
- ▶ Longer life and better performance of the sucker
- ▶ All types available to optimize performance of your machine for specific applications
- ▶ Best prices – get the best value on suckers

Parts From Muller Martini

Whatever You Need, Whenever You Need It!

1.888.2.MULLER (1.888.268.5537)

- ▶ 24/7/365 Availability.
- ▶ Large inventory, ready to ship.
- ▶ Top quality, backed by Muller Martini.
- ▶ Easy ordering, with the expertise of our Parts Specialists to assist you.

Printing Presses

Automated web printing presses with in-line finishing and a wide array of sizes provide consistent print quality. Orders placed once can be easily reproduced and therefore processed more quickly.

Press Delivery Systems

The press delivery system calls for efficient, reliable solutions: transporting printed signatures, trimming, forming logs or bundles, palletizing and forming rolls. The ideal connection between press and print finishing.

Saddle Stitching Systems

A complete range of saddle stitchers, inserting, film-wrapping and packaging systems – in a wide array of performance classes – automate print finishing. Modern systems manufacture products in first-class quality with great added value.

Softcover Production

Perfect binding lines in all performance classes produce a wide range of spine- glued products such as brochures, magazines, catalogs and paperback books... in perfect quality at the highest speeds.

Hardcover Production

Hardcover machines, whether connected in-line or as individual units, master all the processing steps needed to create finished books from folded signatures with hard covers and protective jackets.

Newspaper Mailroom Systems

Powerful and flexible mailroom systems transport and process freshly printed newspapers fully automatically, from the press through the inserting process, bundling and up to the loading ramp.

Digital Book Production

With the unique total solution for digital book production, printed products are produced in one operation – from prepress data through digital printing and finishing right through to the finished product.

This brochure may show components that are not part of the standard equipment and are available as options only. In some cases, protective covers in photographs have been removed or opened for illustrative purposes. Design and equipment configuration are subject to change.
